Upgradeable, Design Quality, Efficiency & Ease of Use

Experience the Brother Advantage....

Drawing upon our long history in laser printing and inkjet printing, our latest generation garment printers offer a fully integrated printing system. All critical firmware, software and printheads are manufactured by Brother. Coupled with our specially formulated inks and advanced features, this next generation of garment printer gives us an edge above the competition. We encourage you to experience the Brother Advantage!

Upgradeable

The unique, modular construction of the GT-3 Series allows you to expand at the rate of your business.

Design Quality

■ Up to 1200dpi
Our acclaimed industrial print-heads have been redesigned to drop even finer ink droplets to print a more dense saturation (up to 1200 dpi) resulting in a crisp, clear image. You can now select either fast print mode (600 dpi) or fine print mode (1200 dpi).

■ Wider Color Gamut
Our newly formulated inks provide a wider color gamut for truer color matching.

One-Pass Technology

■ Faster better in any case, isn't it?
One-pass technology let GT-3 (excluding GT-341) print white under base and color simultaneously rather than laying down white under base and color layers separately.

■ Wash-ability
Our machines, when used with genuine Brother® inks provide a high washing colorfast AATCC rating of 4.

■ Interchangeable Platens
The GT-3 series are equipped with a standard platen of 35.56 x 40,64 cm. In addition, it is possible to obtain various optional platen e.g. sleeve platen or platen for small textiles.

Efficiency & Ease of Use

■ Printer Driver
Plug and Play. No RIP Required. Our printers have their own printer driver, enabling the user to operate without complicated RIP software.

■ USB Drive Compatibility
The GT-3 models are all equipped with a USB port, no computer hookup is needed. Print directly from your USB drive.
